

PROVISIONAL PRODUCT DATA SHEET

SikaBiresin[®] TD200 / SikaBiresin[®] TD150

EPOXY CASTING RESIN WITH HIGH TRANSPARENCY FOR DEEP POUR IN ONE SHOT – PATENT PENDING

APPLICATIONS

- For applications furniture, art and decoration to make deep pour transparent and UV resistant castings such as river table, embeddings, mock-ups, trophies

MAIN PROPERTIES

- High transparency
- High UV resistance
- 20% bio-based resin content
- Easy mixing ratio 2:1
- Low viscosity
- Self-degassing behaviour
- As deep as 75 mm casting thickness achievable @ 20°C in one shot pouring

DESCRIPTION

Basis	Two component epoxy system
Component A	SikaBiresin[®] TD200 , epoxy resin, unfilled, bluish-transparent
Component B	SikaBiresin[®] TD150 , amine, unfilled, transparent

PHYSICAL PROPERTIES

		Resin (A)	Hardener (B)
		SikaBiresin[®] TD200	SikaBiresin[®] TD150
Components			
Viscosity, 25 °C	mPa.s	450	100
Density	g/cm ³	1.09	0.98
Mixing ratio	by weight	100	45
Mixing ratio	by volume	100	50
		Mixture	
Colour		Transparent	
Viscosity, 25 °C	mPa.s	250	
Reactivity on 1,500 g, 25 °C	h	21	

MECHANICAL AND THERMAL PROPERTIES

(approx. values on standard-sized specimen / after curing 7 days at RT)

Shore hardness	- after 7 days, 23 °C	ISO 868	D1	76
Shore hardness	- after 14 days, 23 °C	ISO 868	D1	80
After 14 days at 23 °C				
Flexural modulus		ISO 178	MPa	1,400
Elongation at maximum strength		ISO 527	%	4.5
Impact strength (CHARPY)		ISO 179	kJ/m ²	69
Glass transition temperature (TG)		ISO 11359-2	°C	45

SPECIFIC PROPERTIES

Maximum casting thickness on plate 350 mm x 300 mm	Room temperature	Thickness (mm)
Lowest temperature to work with	17 °C	90 – 100
	20 °C	75
	23 °C with fan	N/A
	23 °C	50 – 60
Highest temperature to work with	26 °C	45
	29 °C	25

PACKAGING UNITS

- | | |
|---|---------------------------|
| ■ Resin (A), SikaBiresin® TD200 | 5 kg |
| ■ Hardener (B), SikaBiresin® TD150 | 950 kg / 200 kg / 2.25 kg |

PROCESSING DATA

- According to long pot life and low viscosity the casting frame must be perfectly tight. Brown PE packing tape is self-releasing from the resin and could be used in corners of the box. Resin should not bond.
- A liquid or pasty wax could be also used to prevent bonding on models and supports. The wood or porous surfaces of models must be sealed before casting the resin. Quick setting epoxy or a varnish could be used but sealer must be cured prior to casting of SikaBiresin® TD200/TD150.
- Prior to use check the material for homogeneity and crystallization.
- After prolonged storage at low temperature, crystallization of components may occur. This process can be easily reversed by heating the affected component to a maximum of 70 °C until the crystals have disappeared. Allow to cool down to requested processing temperature before use.
- Mixing should be done by hand or with an electric mixer. Be careful not to incorporate too much air while mixing. Emulsion must be avoided.
- After a primary mixing in a bucket pour the product in a second bucket and finish the mixing. Scrap well the walls of the mixing container.
- Prior to casting the mixing can be left for self-degassing for 15 to 30 minutes. Alternatively, the mixing can be evacuated in a vacuum chamber.
- Room temperature is the most important parameter to be successful in SikaBiresin® TD200/TD150 casting. There is a link in between room temperature (RT), volume of casting resin and curing speed. Excessive thickness or room temperature may induce high exothermic reaction leading to yellowing, cracks or uneven surface once cured.
- Above 6 kg volume and a casting height of more than 55 mm it is recommended to decrease the exothermic temperature by using a fan or reducing the room temperature.
- After casting and some relaxation time the remaining bubbles can be easily removed with a hot air-stream gun (sweep the surface at 15 – 20 cm of distance).
- A thin sanding and polishing are almost always needed to get shiny and flat surface. Use appropriate tools to avoid heat on the resin when polishing. Water sandpaper is advised.
- Prolonged intensive UV exposure can lead to optical changes or changes in transparency.
- Containers must be closed tightly immediately after use to prevent moisture ingress.
- Once opened the Product shall be used up as soon as possible.

STORAGE CONDITIONS

Shelf life	■ Resin (A), SikaBiresin® TD200	12 months
	■ Hardener (B), SikaBiresin® TD150	12 months
Storage temperature	■ Resin (A), SikaBiresin® TD200	15 °C – 25 °C
	■ Hardener (B), SikaBiresin® TD150	15 °C – 25 °C

FURTHER INFORMATION

The information herein is offered for general guidance only. Advice on specific applications is available on request from the Technical Department of Sika Advanced Resins. Copies of the following publications are available on request: Safety Data Sheets

BASIS OF PRODUCT DATA

All technical data stated in this document are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

HEALTH AND SAFETY INFORMATION

For information and advice regarding transportation, handling, storage and disposal of chemical products, users shall refer to the actual Safety Data Sheets containing physical, ecological, toxicological and other safety-related data.

LEGAL NOTICE

The information, and, in particular, the recommendations relating to the application and end use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
